

Caananite Origins of the Kabbalah

To find the true origins of the cabala, we have to find the origins of humanity. The Tradition says that God himself reveal the cabala to Adam after his fall when Adam finally felt arepentend and pray god for forgiveness.

For many times scholars consider Egypt to be the oldest civilization, many occult olders start to look to Egypt as the mother of the occult sciences, an many claim to have a direct lineage to the Egyptian hermetist.

But today we know better. The Egyptian aren't the oldest civilization. The Summerians are. The anthropologist found this after noticing the strange name of some pharaohs, this name weren't egyptian in nature, it seems they were in and older language, and older civilization had to existed before the egyptians, this culture was the Summerian. Today we use terms like Babylonian, Sumerian an Chaldean as synonyms, this is because they are essentially the same culture on different periods of time, after several wars between the city-states, invations , mixture of cultures and shift of power, the summerians turn into de Acadians the Acadians into Assyrians, the Assyrians into Babylonians and the Babylonians into Chaldeans. We have to kept in mind that if this groups represent different mixtures of races, they all share the same territory, Mesopotamia, the land between the two rivers Tigris and Euphrates. Beyond this two revers, perhaps where now the Persian Golf is located, two missing rivers irrigate the Land of Eden, the Biblical paradise.

Before the Summerians there is no other civilization because they where all swift out by the Great Flood. Elena Petrova Blavatsky says about the Summerians being the sixth sub-raze of fourth raze, Atlantis. The fifth sub-race where the Semites. Today it is known that many of the story told on the Book of Genesis are a Jewish version of olders storys told by the Summerians, so yes there is a Summerian Noah, if there is a Summerian Noah, could it be a Summerian Cabalah?

Whele the tradition says that after the Great Flood god teach the Cabalah to Noah and to the most righteous mens on every generation. So our chances are very High.

A detail that many people do not know is that the Hebrew and Greek alphabet were adaptations of and older alphabet today call Phoenician. The cabala is all centered on the 22 letter alphabet and let face it, without this alphabet they would be no cabala.

Now, who where this Phoenicians inventors of the alphabet?

Well the Phoenicians is the people who lived on the South of Summer, the where very skill people on the art of navigation, merchants who would travel the whole known world to exchange goods. They also share their alphabet with the whole humanity and it appear that they even travel and discover America in that remote time. They are the same people call in the Bible as the Caananites, is just that the anthropologist use the term Phoenicians to describe their culture during the bronze age, but this is a name the roman empire use to describe them, the Caananites didn't call themselves Phoenicians. Sometimes in the early periods they are call Amorites (around 2000ac).

Well the Summerians invented astrology, mathematics, alchemy, the first tipe of writing (but not the alphabet, invented by the Amorites or Phoenicians) and of course ritual magic.

Their writing was not easy to learn, the Cunneiform writing, so when the amorites establish their government on the Cities of Isin and Larsa, the Asirian empire was born. The asirian language was written on the cuneiform ideograms until the adoption of the arameic on the year 752bc.

The Arameic language is a semitic language mother of the Hebrew language, it was written using the Phoenician alphabet. This is very important because the arameic language was spoken not only on Mesopotamia but in all the Middle East, it is the language use to write the original bible with Ezra latter transliterate to Hebrew character, it was also the language Jesus himself spoke, and it was like the latin language in roman time, a universal language use by educated people to communicate to each other around different nations.

So now, speaking about the origins of the cabalah, It should be very clear that with the invention of math and the 22 letter alphabet, the cabalah was born as a collateral philosophy of numbers and letters. If you want to express the infinite possibilities of creation, you need a set of elements that once put together in different forms could give and infinite output or possibilities, and this is what the alephbeth (alphabet) does, so god himself when creating the infinite universe had to use the alephbeth, the word, the verb, to create it since here is found a specific set of element that when mix togheter in different forms can create and infinite of possible conbinations.

Now, if the Caananites invented the Cabalah, who invented the tree of life?

It is my believe that the egyptian invented the sephiroth, and the Jewish invented the path and arrange of the tree of life.

It is said that the egyptians invented the concept of zero. If this is true, then they invented the sephiroth. With the invention of zero and the decimal system you can count and count and number any number from zero to the infinite.

The Tree of Life is precisely that a decimal system so arranged with the intention to illustrate the infinite in a definite way.

There is an Egyptian papyrus called Nesi Amsu, in the chapter called the Paut Neteru or Company of the Gods with arrange the ten divinities responsible of the creation in a way identical to the tree of life, the Gods are seen like emanations from one single source, here Ra says:

"I was alone. I made a foundation for my heart (*or* will), and I created multitudes of things which evolved themselves like unto the evolutions of the god Khepera, and their offspring came into being from the evolutions of their births. I emitted from myself the gods Shu and Tefnut, and from being One I became Three; Shu and Tefnut brought forth Seb and Nut, and Nut brought forth Osiris, Horus-khent-an-maa, Sut, Isis, and Nephthys at one birth."

The Egyptians also believe that words were powerful and that some combinations of sounds could heal or cause. They also believe that the gods could be summoned to visible appearance and then compelled or forced to do the magicians will, while the other nations around them were afraid of their gods and only try to please them with the sacrifices and then hope that the gods will be nice to them. The magic circle however was introduced not by the Egyptians but by the Babylonians.

So how the Jewish ended being credited as the custodians of the Cabalah?

Well remember that the founder of the Jewish people was Abraham from Canaan, and that the Jewish people were slaves in Babylon and Egypt, then Moses himself was an initiate in the Egyptian Mysteries, do I have to explain further?

Finally, during the renaissance after the publication of the Sepher Yetzirah the Jewish scholars start to try different possible arrangements of the tree of life Sephiroth and its path of 22 letters. The two most known Jewish scholars on attempting this were the Ar"i (Rabbi Yitzchak Luria) and the second by the Gr"a (Rabbi Ha'Gaon Eliyahu of Vilna).

But the Tree of Life as we know it today is not at all a Jewish invention but a Christian one! that was introduced by the Jesuit, Kircher. He used his tree to reconcile Catholic Theology with Jewish thinking. In 1856 The French Occultist Eliphas Levi will add the Hebrew letters to the tarot cards and will venerate the tarot with the cabala and the Tree.

To conclude, let's imagine what the Cabalah was in the times of Canaan and Babylon, Well the ten Sephiroth tree of life didn't exist yet, but the Canaanites knew at least seven Sephiroth and 22 paths, the seven Sephiroth are the forces of the seven planets, over the seven planets, the Great Abyss, the home of Tiamat, The Serpent of Old, the Outer Space. The Seven Pointed Star is the symbol of Astarte, Goddess of the Canaanites and of Magic. If Christianity find its origins 2,000 years ago, Occultism has its origins 6,000 years ago with the Sumerian, Babylonians, Canaanites, Assyrians etc. Does, Sumerians really invented Cabalah or is the Cabalah, the astrology, math etc the legacy of Atlantis?
